The amendment received 8 February 2012 has been made of record. Claims 1 and 3-41 are pending. Claims 11-41 have been withdrawn from consideration.

Claims 1 and 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koga et al '697 in view of Arita et al '632 and Ouchi et al '175.

This rejection is maintained for reasons of record. Applicants' arguments appear to focus on the allegation that Koga et al does not teach or even fairly suggest a polyhydric alcohol having I/O meeting the instant limitations.

The examiner disagrees. Applicants' attention is directed to the triethylene glycol and 1,5 pentanediol, among others, explicitly recited by the reference as suitable solvent ([0032]). These species have, by applicants' own definition, I/O's and, for 1, 5 pentanediol, structure meeting the limitations of the rejected claims

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
